### **DETAILED ACTION**

Claims 1-49 are pending in the application.

**NOTE:** The applicants are reminded that the claims were renumbered under Rule 1.126. There were two claims 34, thus the second occurrence of claim 34 and claims 35-48 have been renumbered to claims 35-49. The claim dependency has not been corrected, thus any correction in view of the renumbering of the claims is required.

Appropriate correction is required.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 15, 16, 25-39, 47 and 48, drawn to the compounds, compositions and method of use of the bisbenzamindines of formula I where the Linker is 1,4-piperazinediyl.

Group II, claim(s) 1, 13-15, 25-39, 47 and 48, drawn to the compounds, compositions and method of use of the bisbenzamindines of formula I where the Linker is 1,4-homopiperazinediyl.

Group III, claim(s) 1, 2, 13, 15, 25-29, 47 and 48, drawn to the compounds, compositions and method of use of the bisbenzamindines of formula I where the Linker is other than that embraced by Groups I and II above.

Group IV, claim(s) 17, drawn to the bisbenzamidine of formula II.

Group V, claim(s) 18 and 19, drawn to the bisbenzamindines as claimed therein.

Group VI, claim(s) 20-24 and 40-48, drawn to the complex compositions and method of use of the complex compositions of formula I and an additional active ingredient.

Group VII, claim(s) 49, drawn to a kit.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I-V are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of Linker in formulae I and II do not belong to a recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others, for example a 1,4-piperazinediyl compound is different from a 1,4-homopiperazinediyl compound, etc. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

Groups I-V are directed to the compounds, compositions and method of use of the compounds of formulae I or II and Group VI is directed to complex compositions which includes the compounds of Groups I-V and an additional active ingredient.

Group VII is directed to a kit used for the dispersal of the compounds of formula I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

**Tentative election of a single species within the elected group is further required.**

If Groups III, IV, VI or VII are elected further restriction may be required.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
